

ITALIA^{AT} RSACTM Conference

23-26 March | San Francisco

ITA - Italian Trade Agency is the Governmental agency that supports the business development of our companies abroad and promotes the attraction of foreign investment in Italy, through "Invest in Italy", a project operated with Invitalia. With a motivated and modern organization and a global network of 87 offices in 74 countries, ITA provides information, assistance, consulting, promotion and training to Italian small and medium-sized businesses in the industrial, consumer goods and services sectors. Using the most modern multi-channel promotion and communication tools, it acts to assert the excellence of Made in Italy in the world. Every year, ITA worldwide offices carry out hundreds of promotional projects and provide personalized services and assistance to thousands of Italian companies. The Italian Trade Agency also assists and supports foreign companies that want to establish or expand business and trade relations with Italian companies or to invest in Italy.

The Italian Trade Agency collaborates with Italian Regions, Chambers of Commerce, Industry and Trade Associations and other public and private organizations.

ITALY'S NATIONAL CYBERSECURITY AGENCY

The National Cybersecurity Agency (ACN) is the Italian cybersecurity authority for the protection of national interests in the field of cybersecurity. The Agency is responsible for safeguarding security and resilience in cyberspace. It is responsible for preventing and mitigating cyber incidents, and for promoting the achievement of technological autonomy. Among the Agency's main tasks is the implementation of the National Cybersecurity Strategy, adopted by the President of the Council of Ministers, which contains the goals to be pursued by 2026.

The National Cybersecurity Agency has been appointed as the Italian National Coordination Centre (NCC-IT), which supports the mission of the European Cybersecurity Competence Centre (ECCC) to strengthen the EU's strategic autonomy and to support the development of its technology and industrial cybersecurity capacities and knowledge. The NCC-IT acts as national point of contact between the national cybersecurity ecosystem and the ECCC.

The Agency has supported the establishment of the Cyber Innovation Network, a strategic network aimed at supporting the development of highly innovative entrepreneurship in the field of cybersecurity.

Olivia Forecasting for Security is an AI-driven predictive analytics platform that anticipates cyber threats, vulnerabilities, and security workloads. By analyzing historical logs, threat intelligence, and system behavior, the platform forecasts attack volumes, exploit likelihood, and incident trends. This enables organizations to prioritize defenses, allocate resources efficiently, and shift from reactive cybersecurity to proactive risk management.

-  BitCorp
-  @bitcorp_srl

bitCorp develops transparent cybersecurity solutions designed to guarantee full data sovereignty. Our platform uses lightweight proprietary AI models trained directly on the customer's infrastructure, ensuring that sensitive data never leaves the organization. This approach improves detection accuracy, reduces false positives and operational workload, and enables organizations to strengthen their security posture with efficient, energy-conscious technology.
